Now the young talents are taking over

The Spanish Riding School Vienna presents a new summer program “Work with the Young Stallions” from July 4th to August 6th, 2022

During the “Work with the young stallions” spectators get interesting insights into the work routines of the Riders and their young Lipizzaners, the stars of tomorrow. This new program displays how the traditions, which have been practiced at the Spanish Riding School for the last 457 years, are transferred almost unchanged to the present day

For our visitors who have come to admire the Lipizzaners of the Spanish Riding School and are neither horse experts nor riders, the training of the young stallions is particularly interesting, as the exercises are explained in detail demonstrating the commitment and work hard required to achieve perfection as each Rider and horse strives for perfection.

targeted training of the basic gaits "walk, trot and canter", the basis of perfection for every equestrian rider are the main elements of the exercises for these young Lipizzaner talents.

Over the course of the 45-minute program spectators will observe how each stallion is trained according to his nature personality? Indeed, able viewers might recognize one of our young stallions has the talent to execute a perfect Capriole or Courbette after having completed his training

Enjoy the future stars of the Spanish Riding School during their first training sessions in the imperial ambience of the baroque Winter Riding School, accompanied by commentary and classical Viennese music.
